Subject Index—Volume 11

A

Activation of serum complement by contrast media, 303
Algorithm, a computer program for the localization of small areas in roentgenological images, 125
Allergy, Theory of, of radiocontrast agent toxicity: demonstration of antibody activity in sera of patients suffering major radiocontrast agent reactions, 347
Alveolography, biological disposition of perfluoroctylbromide: tracheal administration in bronchography and, 479
Angiography
  cerebral, clinical comparison of three contrast agents used in, 602
  cerebral microvascular injury in experimental drug abuse, 282
  coronary, comparison of left ventricular ejection fraction and regional contractility fraction pre and post, 138
  experimental renal artery thromboembolism, 88
  mechanism of hypotension following, 472
  splanchnic, bradykinin-induced changes in caliber of portal vein during, 10
Antibodies to radiographic contrast agents: induction and characterization of rabbit antibody, 1
Appropriate models of acute renal failure (letter to editor), 338
Arrhythmia, slow response induced in canine Purkinje fiber by contrast medium, 577
Arteriography
  cardiac, mechanism of production of cardiac conduction abnormalities due to, in dogs, 563
  coronary, cardiac function during, with calcium enriched diatrizoate and metrizamide, 569
Arthrography
  evaluation of various contrast agents for improved, 528
  with Amipaque (metrizamide) and other contrast media, 534
Automated fluorescent excitation analysis system for medical applications, 210

B

Bayesian model, evaluation of a computerized, for diagnosis of renal cyst vs. tumor vs. normal variant from excretory urogram information, 102
Bayesian statistics, analysis of the value of additional diagnostic procedures, 249
Biliary and urinary iopanoic acid excretion (letter to editor), 63
Biplane radiography, cardiac volume measurement errors, 295
Blood flow, hepatic, new approach to evaluating, in presence of intrahepatic portal systemic shunting, 146
Bone mineral measurements, comparisons between x-ray photodensitometric and gamma-ray absorptio-metric findings of, and evidence of their convertibility, 550
Bowel dispase, inflammatory, skeletal demineralization
Bowel disease, inflammatory, skeletal demineralization and growth retardation, 541
Bradykinin, effect of, on portal pressure and portal caliber in the dog: an experimental study, 11
Bradykinin-induced changes in caliber of portal vein during splanchnic angiography, 10

C

Calcification, x-ray appearance and clinical significance of left atrial wall, 501
Canine lungs, acute lobar collapse in, 518
Cardiac conduction abnormalities, mechanism of production of, due to coronary arteriography, 563
Cardiac volume measurement errors, 295
Cerebral infarction, gallium-67 citrate in, 20
Cerebral microvascular injury in experimental drug abuse, 282
Chest radiographs, automated computer screening of, for pneumoconiosis, 258
Cholangiography, intravenous, in rhesus monkey: part I, determination of optimal iodipamide dose during a one-hour infusion, 45
Cholecystokinin (CCK), role of, in radiographic opacification of the gallbladder, 440
Choroid plexus, ultrastructural effects of Conray 60 and pentopaque on ependyma and, following intraventricular injections, 112
Clot, natural history of autologous blood, embolization in swine, 267
Comparison of three cholecystographic agents: a double-blind study with and without a prior fatty meal (Critical review), 152
Complement, activation of serum, by contrast media, 303
Complement components, measurement of histamine, immune complexes and, during patient reactions to iodinated contrast material, 98
Compton scattered gamma rays, use of, for tomography, 225
Compton scattering, technique for measurement of stable iodine in tissues using x-ray fluorescence and, 60
Computer, automated, screening of chest radiographs for pneumoconiosis, 258
Conray 60, ultrastructural effects of pantopaque and, on ependyma and choroid plexus following intraventricular injections, 112
Contrast media
  activation of serum complement by, 303
  allergic theory of, demonstration of antibody activity in sera of patients suffering major radiocontrast agent reactions, 347
  antibodies to: induction and characterization of rabbit antibody, 1
  arthrography with Ampaque (metrizamide) and other, 534
  automated fluorescent excitation analysis system for medical applications, 210
  biliary and urinary excretion and the choleretic effect of ioglycamide in dogs, 449
  biological disposition of perfluoroctylbromide: tracheal administration in alveolography and bronchography, 479

Subject Index—Volume 11

A

Activation of serum complement by contrast media, 303
Algorithm, a computer program for the localization of small areas in roentgenological images, 125
Allergy, Theory of, of radiocontrast agent toxicity: demonstration of antibody activity in sera of patients suffering major radiocontrast agent reactions, 347
Alveolography, biological disposition of perfluoroctylbromide: tracheal administration in bronchography and, 479
Angiography
  cerebral, clinical comparison of three contrast agents used in, 602
  cerebral microvascular injury in experimental drug abuse, 282
  coronary, comparison of left ventricular ejection fraction and regional contractility fraction pre and post, 138
  experimental renal artery thromboembolism, 88
  mechanism of hypotension following, 472
  splanchnic, bradykinin-induced changes in caliber of portal vein during, 10
Antibodies to radiographic contrast agents: induction and characterization of rabbit antibody, 1
Appropriate models of acute renal failure (letter to editor), 338
Arrhythmia, slow response induced in canine Purkinje fiber by contrast medium, 577
Arteriography
  cardiac, mechanism of production of cardiac conduction abnormalities due to, in dogs, 563
  coronary, cardiac function during, with calcium enriched diatrizoate and metrizamide, 569
Arthrography
  evaluation of various contrast agents for improved, 528
  with Amipaque (metrizamide) and other contrast media, 534
Automated fluorescent excitation analysis system for medical applications, 210

B

Bayesian model, evaluation of a computerized, for diagnosis of renal cyst vs. tumor vs. normal variant from excretory urogram information, 102
Bayesian statistics, analysis of the value of additional diagnostic procedures, 249
Biliary and urinary iopanoic acid excretion (letter to editor), 63
Biplane radiography, cardiac volume measurement errors, 295
Blood flow, hepatic, new approach to evaluating, in presence of intrahepatic portal systemic shunting, 146
Bone mineral measurements, comparisons between x-ray photodensitometric and gamma-ray absorptio-metric findings of, and evidence of their convertibility, 550
Bowel dispase, inflammatory, skeletal demineralization
Bowel disease, inflammatory, skeletal demineralization and growth retardation, 541
Bradykinin, effect of, on portal pressure and portal caliber in the dog: an experimental study, 11
Bradykinin-induced changes in caliber of portal vein during splanchnic angiography, 10

C

Calcification, x-ray appearance and clinical significance of left atrial wall, 501
Canine lungs, acute lobar collapse in, 518
Cardiac conduction abnormalities, mechanism of production of, due to coronary arteriography, 563
Cardiac volume measurement errors, 295
Cerebral infarction, gallium-67 citrate in, 20
Cerebral microvascular injury in experimental drug abuse, 282
Chest radiographs, automated computer screening of, for pneumoconiosis, 258
Cholangiography, intravenous, in rhesus monkey: part I, determination of optimal iodipamide dose during a one-hour infusion, 45
Cholecystokinin (CCK), role of, in radiographic opacification of the gallbladder, 440
Choroid plexus, ultrastructural effects of Conray 60 and pentopaque on ependyma and, following intraventricular injections, 112
Clot, natural history of autologous blood, embolization in swine, 267
Comparison of three cholecystographic agents: a double-blind study with and without a prior fatty meal (Critical review), 152
Complement, activation of serum, by contrast media, 303
Complement components, measurement of histamine, immune complexes and, during patient reactions to iodinated contrast material, 98
Compton scattered gamma rays, use of, for tomography, 225
Compton scattering, technique for measurement of stable iodine in tissues using x-ray fluorescence and, 60
Computer, automated, screening of chest radiographs for pneumoconiosis, 258
Conray 60, ultrastructural effects of pantopaque and, on ependyma and choroid plexus following intraventricular injections, 112
Contrast media
  activation of serum complement by, 303
  allergic theory of, demonstration of antibody activity in sera of patients suffering major radiocontrast agent reactions, 347
  antibodies to: induction and characterization of rabbit antibody, 1
  arthrography with Ampaque (metrizamide) and other, 534
  automated fluorescent excitation analysis system for medical applications, 210
  biliary and urinary excretion and the choleretic effect of ioglycamide in dogs, 449
  biological disposition of perfluoroctylbromide: tracheal administration in alveolography and bronchography, 479

biotransformation of ioglycamic acid, iodoxamic acid and iotroxic acid in man, 598
cardiac function during coronary arteriography with calcium enriched diatrizoate and metrizamide, 569
cholangiographic excretion studies: comparison of iodipamide and iodoxamate in the dog, 459
clinical comparison of three, used in cerebral angiography, 602
effects of the intracoronary and intraventricular injections of Renografin 76 and Isopaque 370, 172
evaluation of, for improved arthrography, 528
influences on the rate of absorption of the cholecystographic, iosumetic acid in man, 315
interaction of ligandin with radiographic, 594
intrathecal tolerance of metrizamide in chloralose anesthetized cuts, 182
measurement of histamine, complement components and immune complexes during patient reactions to iodinated, 98
mechanism of hypotension following angiography, 472
metrizamide in experimental urography: IV effects of bilateral ureteric stasis on urine iodine concentration after intravenous infection of an ionic and a non-ionic, 80
metrizamide in experimental urography. V renal excretion mechanism of a non-ionic, in rabbit and cat, 187
myelography with perfluoroctylbromide: comparison with Pantopaqe, 319
reduced red cell membrane potential and acidification of the plasma in response to, 588
slow response induced in canine Purkinje fiber by, 577
studies on the acute toxicity of ionic and non-ionic, following rapid intravenous injection: experimental study in mice, 309
testing of myelographic, using the pig as an experimental animal, 331

D

Dog, effect of bradykinin on portal pressure and portal caliber in the, 14

E

Embolization, natural history of autologous blood clot, in swine, 267
Enterohepatic circulation, saturation kinetics of iopanoate in dogs with an intact, 32
Ependyma, ultrastructural effects of Conray 60 and pentopaque on choroid plexus and, following intraventricular injections, 112
Esophageal blood flow, sequential feline, perfusion measurements in vivo, 216
Experimental cerebral infarction in the monkey: radiographic evaluation of steroid therapy, 195

F

Fluorescent excitation analysis, in vivo measurement of hepatic iodine concentration using, 134
Fluoroscopy
capability of fluoroscopic systems for the production of computerized axial tomograms, 434
cardiac, velocity of left ventricular wall motion determined by fluoroscopic videodensitometry, 24
response of fluoroscopic image intensifier-TV systems, 335

G

Gallbladder
role of cholecystokinin in radiographic opacification of, 440
ultrasonic visualization of the non-opacified, 464
Gallium-67 citrate in cerebral infarction, 20
Gamma scintillation camera, considerations of thallium-201 as a myocardial radionuclide imaging agent in man with, 163
Growth retardation, skeletal demineralization and, in inflammatory bowel disease, 541

H

Hepatic excretion of iodipamide, role of serum albumin in, 39
Hodgkin's disease, radiographic changes resembling, in animals receiving trypan blue, 236
Hydrocephalus, obstructive, positive contrast ventriculography in cuts with experimental, 605
Hypertension, location of increased resistance to portal blood flow in obstructive jaundice, 54
Hypotension, renal artery, nephrogram of normovolemic, 71

I

Images, computer program for the localization of small areas in roentgenological, 125
Immune complexes, measurement of histamine, complement components and, during patient reactions to iodinated contrast material, 98
Intestinal infarction, radionuclide imaging of, in dogs, 277
Intrahepatic portal systemic shunting, new approach in evaluating hepatic blood flow in the presence of, 146
Iodine concentration, in vivo measurement of hepatic, using fluorescent excitation analysis, 134
Iodipamide
cholangiographic excretion studies: comparison of iodoxamate and, in the dog, 459
role of serum albumin in the hepatic excretion of, 39
Ioglycamic acid, biotransformation of iodoxamic acid, iotroxic acid, and, in man, 598
Ioglycamide, biliary and urinary excretion and the choleretic effect of, in dogs, 449
Iopanoate, saturation kinetics of, in dogs with an intact enterohepatic circulation, 32
Iosumetic acid, influences on the rate of absorption of the cholecystographic contrast medium, in man, 315
Ischemia, regional, method for the study of, in the intact dog, 556
Isopaque 370, effects of the intracoronary and intraventricular injections of Renografin 76 vs., 172

J

Jaundice, obstructive, location of increased resistance to portal blood flow in, 54

L

Left atrium calcification, x-ray appearance and clinical significance of, 501

Left ventricular ejection it, fraction, comparison of regional contractility fraction and, pre and post coronary angiography, 138
Ligandin, interaction of, with radiographic contrast media, 594
Lobar collapse, acute, in canine lungs, 518

M

Metrizamide, intrathecal tolerance of, in chloralose anesthetized cats, 182
Myelography with perfluoroctylbromide: comparison with Pantopaque, 319

N

Nephrogram of normovolemic, renal artery hypotension, 71
Non-screen techniques (medical vs. industrial film), comparison of, for fine-detail skeletal radiography, 486
Nuclear scintigraphy, gallium-67 citrate in cerebral infarction, 20

P

Pantopaque
  myelography with perfluoroctylbromide: comparison with, 319
  ultrastructural effects of Conray 60 and, on ependyma and choroid plexus following intraventricular injections, 112
Perfluoroctylbromide, biological disposition of, tracheal administration in alveolography and bronchography, 479
Pneumomoconiosis, automated computer screening of chest radiographs for, 258
Portal pressure, effect of bradykinin on, and portal caliber in the dog: an experimental angiographic study, 14
Portal vein, bradykinin-induced changes of, during splanchnic angiography, 10
Portography, location of increased resistance to portal blood flow in obstructive jaundice, 54
Positive immunological responses to contrast media (letter to editor), 240
Pressure-length loop, method for study of regional ischemic dysfunction in the intact dog: permanent endocardial markers and the, 556
Probability, analysis of the value of additional diagnostic procedures, 249

R

Radiography, skeletal, comparison of non-screen techniques (medical vs. industrial film) for fine-detail, 486
Radiology internship (guest editorial), 241
Reduced red cell membrane potential and acidification of the plasma in response to contrast material, 588
Renal cyst/tumor/normal variant evaluation of a computerized Bayesian model for diagnosis of, from excretory urogram information, 102
Renografin 76, effects of the intracoronary and intraventricular injections of Isopaque 370 vs., 172
Rubidium 86, sequential feline esophageal nutrient blood flow: perfusion measurements in vivo, 216

S

Saturation kinetics
  of iopanoate in dogs with an intact enterohepatic circulation, 32
Serum albumin, role of, in hepatic excretion of iodipamide, 39
Skeletal demineralization and growth retardation in inflammatory bowel disease, 541
Spinal fusion, kinematic analysis of, 202
Spinal cord injury in animals, rapid non-operative technique for producing, 150
Stereophotogrammetry, kinematic analysis of spinal fusions, 202
Steroid therapy, experimental cerebral infarction in the monkey: radiographic evaluation of, 195

T

Technetium 99m-pyrophosphate, radionuclide imaging of intestinal infarction in dogs, 277
Television, response of fluoroscopic image intensifier-TV systems, 335
Thallium-201, considerations of, as a myocardial radionuclide imaging agent in man, 163
Thromboembolism, experimental renal artery, 88
Tomography
  capability of fluoroscopic systems for the production of computerized axial tomograms, 434
  computerized, dose reduction in, (guest editorial), 508
  use of Compton scattered gamma rays for, 225
Toxicity
  antibodies to radiographic contrast agents: induction and characterization of rabbit antibody, 1
  studies on the acute, of ionic and non-ionic contrast media following rapid intravenous injection: experimental study in mice, 309
Trypan blue, radiographic changes resembling Hodgkin's disease in animals receiving, 236

U

Ultrasonography, B-scan, visualization of the non-opacified gallbladder, 464
Urography
  experimental, metrizamide in: IV. effects of bilateral ureteric stasis on urine iodine concentration after intravenous infection of an ionic and a non-ionic contrast medium, 80
  experimental, metrizamide in, V Renal excretion mechanism of a non-ionic contrast medium in rabbit and cat, 187
Urography, nephrogram of normovolemic, renal artery hypotension, 71

V

Ventricular wall motion, velocity of, determined by fluoroscopic videodensitometry: a noninvasive method for evaluating myocardial contractile state, 24
Ventriculography, positive contrast, in cats with experimental obstructive hydrocephalus, 605
Videodensitometry, fluoroscopic, velocity of left ventricular wall motion determined by, 24

X

X-ray fluorescence, technique for measurement of stable iodine in tissues using, and Compton scattering, 60
X-ray photodensitometry, comparisons between gamma-ray absorptiometric and, in findings of bone mineral measurements, 550

Guest Referees 1976

The Editors of *Investigative Radiology* thank the following for their help in reviewing submitted manuscripts, and also thank the many colleagues who have worked directly with the members of the Editorial Board:

John Amberg, MD, *University of California at San Diego*

Joseph Bookstein, MD, *University of California at San Diego*

Ronald Castellino, MD, *Stanford University*

Eric Carlson, MD, *University of California at San Francisco*

Gerald Dodd, Jr., MD, *University of Texas at Houston*

Kent Ellis, MD, *Columbia University*

Gordon Gamsu, MD, *University of California at San Francisco*

Harry Genant, MD, *University of California at San Francisco*

Morton Glickman, MD, *Yale University*

Richard Gold, MD, *University of California at Los Angeles*

Norman Hollenberg, MD, *Harvard University*

Pamela Jensen, MD, *Yale University*

Melvyn Korobkin, MD, *University of California at San Francisco*

Bruce McClennan, MD, *George Washington University*

Harry Mellins, MD, *Harvard University*

Sigmund Mittler, MD, *George Washington University*

Stylianos Orphanoudakis, Ph.D., *Yale University*

Carl Ravin, MD, *Yale University*

Richard Reba, MD, *George Washington University*

Norman Silverman, MD, *University of California at San Diego*

William Tuddenham, MD, *Pennsylvania Hospital*

Norman Veall, *Clinical Research Centre, Harrow, Middlesex, England*

Sidney Wallace, MD, *University of Texas at Houston*
